Melbourne, VIC, Australia | Mobile: +61 (0)401 179 442

Work Rights: Australian Permanent Resident

PROFESSIONAL SUMMARY

Full Stack Developer | Fintech and Enterprise Specialist | 10+ Years Experience

Strategic Full Stack Developer with a decade of experience delivering high-performance, scalable web and mobile solutions. Recently spearheaded AI-driven frontend modules at IAG, specializing in real-time LLM chat streaming, integrating NgRx for long-term scalability and architecting AI Agent Chat UIs to streamline complex insurance workflows with frontend integration into GCP based data-pipelines(Cloud Storage, PubSub), and Gemini 2.5 powered AI agents. Expert in TypeScript, Angular (2-19), React, Redux/NgRx and Cloud integration (AWS/Azure), with a proven record of leading teams and delivering complex fintech solutions. A high impact contributor with a track record of reducing production defects by 40% and increasing mobile engagement by 25% through responsive design and user experience.

Proven expertise in integrating third-party APIs (e.g., Zuora, CyberSource) and optimizing CI/CD workflows. Strong advocate for writing clean, reusable and maintainable code and comprehensive technical documentation. A cross-functional leader and mentor who partners with UX, QA, Analysts and backend teams to ship scalable user-centric products using Agile best practices.

SKILLS

Frameworks: Angular (2-19), Angular SSR, React Native, React, Micro-Frontends.

Languages: JavaScript(ES6+), TypeScript, HTML5, Python.

State Management: RxJs, NgRx, Redux.

UI/UX & Styling: PrimeNG, TailwindCSS, Angular Material, CSS3, SASS, Less, Bootstrap, Figma.

Testing: Jasmine, Karma, Jest.

Cloud & DevOps: AWS(S3, CloudFront), Google Cloud Platform, Git, CI/CD Pipelines.

Backend Integration: GraphQL, .NET, Java, Node.js, RESTful APIs.

Database: MySQL, Oracle, PostgreSQL.

Professional Skills: Communication, Adaptability, Problem-solving, Team Collaboration, Mentorship, Stakeholder Management.

EMPLOYMENT EXPERIENCE

Senior Frontend Developer

Insurance Australia Group (IAG), Melbourne, Australia | Sep 2025 - Present

Responsibilities:

- Developed and enhanced the Nexus frontend modules, including:
 - Report Explorer, helping users navigate and consume reporting outputs more effectively.
 - AI Agent Chat UI, utilized RxJs observables to manage real-time streaming LLM responses from AI Agents built with Pydantic AI and Gemini 2.5, enhancing interaction flow and reducing perceived latency for domain-specific assistant experiences.
 - Admin Panel features to improve configuration, management workflows, and overall operational efficiency.
- Built role-based UI capabilities, including permission-aware visibility for the latest Release Updates.
- Elevated code quality standards through structured peer reviews, improving maintainability and reducing regression defects.

- Mentored peers on browser-based style debugging techniques and frontend troubleshooting workflows.
- Investigated and fixed UAT defects, coordinating with QA/product stakeholders for timely resolution.
- Collaborated within a multi-product platform context, aligning UI implementations with data driven AI and dashboard capabilities.

Achievements:

- Strengthened frontend architecture by introducing NgRx state management, improving state consistency and long term scalability.
- Modernized release communication by delivering permission-based Latest Release Updates, increasing relevance of in-app announcements.
- Optimized platform usability through responsive, mobile-aware layouts and component-level UI refinements.
- Reduced pre-release friction by proactively resolving UAT defects and stabilizing critical user journeys.

Independent Consultant and Technical Upskilling

Sydney, Australia | Jul 2021 - Aug 2025

During my career break, I stayed actively engaged with the tech industry by:

- Advancing in TypeScript, Angular, React and React Native.
- Architected and developed a cross-platform fintech application using React Native to manage goal-based savings that also lets users avail loans for specific goals.
- Built a web application to track transactions from different bank accounts using React, TypeScript and Redux to master modern state management patterns.

Senior Frontend Developer

Servcorp, Sydney, Australia | Dec 2020 - Jun 2021

Responsibilities:

- UI Development: Built single page applications using Angular, React, TypeScript, HTML5, CSS3, RxJs and Redux State Management.
- Tech Lead & Angular Optimisation: Upgraded legacy components to Angular 11, improving performance by 25%.
- Collaborated in an Agile environment to implement new features and UX enhancements.
- Built dynamic forms from templates enhancing the ease of development.
- Integrated Crowdin for internationalisation of the application.
- Resolved production issues.

Achievements:

- Improved User Experience: Collaborated with the UX designers to revamp the user interface, resulting in a 15% increase in user satisfaction score.
- Payment API Integration: Reduced payment failures by 15% and enhanced payment processing capabilities by integrating CyberSource and Zuora payment gateway (REST APIs).
- Delivered high-quality, comprehensive documentation for the frontend codebase and third-party integrations, improving knowledge transfer and onboarding for new team members.

Senior Frontend Developer

Fidelity Information Services, Bangalore, India | Dec 2016 - Feb 2020

Responsibilities:

- Analyzed requirements, elicited validations required for functional requirements and developed single page application UIs for Fintech applications using React, Angular 2, TypeScript, HTML5 and CSS3.
- Played a key role in design reviews and provided input to design recommendations for fintech applications.
- Built features for fund transfer & bill payment modules and an application for submitting Tax and TIN to the US Govt.
- Mentored Junior Developers: Provided mentorship and training to junior developers on the best practices in coding and documentation, contributing to a more skilled and efficient team.
- Reviewed the quality of code for the high-volume internal web application resulting in improved code readability and performance.
- Developed RESTful APIs using Java and SQL to support the backend functionalities.

Achievements:

- Increased Development Efficiency: Built high quality generic micro frontend and reusable Angular components and services that reduced development time for new features by 20%.
- Reduced API calls by 20% thus improving data consistency by designing a centralised and scalable State Management (NgRx store).
- Decreased the number of frontend bugs by 40% through the implementation of rigorous unit testing using Jasmine and Karma.
- Led the development of a responsive design framework using Angular Material and Bootstrap, resulting in a 25% increase in mobile user engagement.
- Award-Winning Work: Received the 'Make a Difference' award multiple times for outstanding contributions to the frontend development.
- **Global finalist in Fintech Hackathon: Proud global finalist in InnovateIN48 2019 conducted by FIS Global**
 - Developed innovative solutions for Customer Data Management using Verifiable Credentials and Zero Knowledge Proof with Hyperledger Indy.
 - Developed Collateral Management solution using Hyperledger Fabric and Indy.

Frontend Developer

Exilant Technologies Pvt Ltd, Bangalore, India | Aug 2012 - Dec 2016

Responsibilities:

- Developed user interfaces using HTML5, CSS3, JavaScript, jQuery, jQuery Mobile and Sencha Touch for various projects in the organisation.
- Ensured cross-browser compatibility and delivered high-quality UI/UX for client projects.
- Developed design documents and provided estimates for client requirements.
- Managed multiple projects concurrently while meeting deadlines consistently.

Achievements:

- Received client appreciation for delivering exceptional UI/UX solutions.
- Led a major iOS project (sole owner), migrating it to the latest iOS version and fixing bugs.

EDUCATION

Bachelor of Engineering in Computer Science
Periyar Maniammai University | May 2012
